

Bormioli Rocco combinations for the dropper pipettes

The effort made by Bormioli Rocco multiplies to provide its own clientele with different combinations with regard to the materials, shapes and colours for the dropper pipettes too.

In fact, the customer may choose between child proof and tamper evident closures of different diameters (18-24-28), between PVC or rubber pump, between the glass type III or PE or PP pipette.

The opportunities to differentiate the product are various: from the colour match of the cap to the shape and size of the pipette.
